DRIVING — SIGNATURE

In the Lexus LS, every detail has been carefully considered. From the Lexus Driving Signature which makes the car hug the road, to the intricate Nishijin-ori design that weaves together silver threads. In creating the Lexus LS, master craftspeople and engineers have meticulously refined every detail to give you a sedan in which everything is driven by the details.

— DRIVING SIGNATURE

The LS was designed to elevate every aspect of driving - performance, ride quality and interior comfort - while preserving the signature Lexus quietness and peace of mind. We've infused advanced technologies to strengthen the connection between driver and car, delivering a confident and exhilarating experience.

LEXUS — DESIGN

The LS evolves Lexus' design principles further ahead. Using artistic expression and precise engineering to create a vehicle of refined poise and luxurious presence. Its confident freedom of movement provides for an ownership experience that will enrich modern lifestyles.

— DESIGN

Exterior

The LS exudes chic sophistication at first sight, fusing sensual beauty with a low centre of gravity to shape a distinctive, confident presence. The beautiful form seamlessly integrates advanced functionality. The flowing lines cascade into the grille and headlamps, highlighting the ever-changing expression of the extraordinary.

— DESIGN

Interior

A refined expression of contemporary luxury, the interior combines a seating arrangement designed to support simple operation and focused concentration for relaxed confident driving, with sublime comfort for deep relaxation. The subtle Japanese aesthetic and spirit of hospitality of Takumi craftsmanship adds to the inviting cabin environment.

LEXUS — PERFORMANCE

The relentless pursuit of perfection to create a superior driving experience has honed the LS's outstanding response and power. This contributes to an exhilarating performance that heightens driving enjoyment every time you drive. The ride is refined and luxurious. Quintessentially Lexus, but matching exactly what you'd expect to experience from a chauffeur-driven vehicle.

— PERFORMANCE

Multi-material body

To achieve body rigidity, low weight and high safety performance, the layout within the LS was improved with stronger material added. Including the use of hot-stamp high tensile steel across the rocker components, pillars and roof. To lower the centre of gravity and improve turning characteristics, aluminium was used in the body frame across the bonnet, boot, fenders, doors and the suspension towers.

— PERFORMANCE

Front engine, Rear wheel drive (FR) platform

The LS takes advantage of a FR platform that Lexus refined to optimise front-to-rear weight distribution. The result is a natural, smooth dynamic when cornering, accelerating and decelerating. The adoption of a low driving position and a layout that keeps the driver's hip point and the vehicle's centre of gravity close together minimises the distance between the driver and the axis of rotation. This heightens the driver's feeling of oneness with the car. In this way, the packaging meticulously refines the motion characteristics to deliver excellent response along with smooth, stable changes in posture during the sequence of movements involved in cornering.

— PERFORMANCE

Suspension

To realise high-quality driving and ride comfort, the Adaptive Variable Suspension (AVS) damping force, stabiliser spring rate, and vertical spring of the wheels were fine-tuned to effectively suppress shock and vibration. This provides high-quality ride comfort and exceptional quietness, as well as realising excellent steering response and stable vehicle posture.

Vehicle Dynamic Integrated Management (VDIM) + Lexus Dynamic Handling (LDH)

VDIM integrates control of engine, braking, steering and other functionality, including the Electric Power Steering (EPS). While the LDH controls the steering angle of the front and rear wheels, as a single system, to provide a high level of active safety. LDH optimises the steering angle of all four wheels based on factors such as vehicle speed and steering inputs, to realise ideal vehicle dynamics for the driver's operation. The result is excellent vehicle stability during high-speed driving and nimble steering response in mid-speed driving on surfaces such as mountain roads.

— PERFORMANCE

Drive mode select

Drive mode select provides integrated control of multiple systems to let you tune performance to suit your driving style. You can select and change between five modes: Normal, Eco, Comfort, Sport S and Sport S+ Modes. In addition, Custom mode enables drivers to set their preferred settings for the powertrain, chassis and air conditioning.

LS 500 - 3.5-litre V6 twin turbocharged engine (V35A-FTS)

This advanced powerplant combines powerful acceleration generated by the flat torque characteristics of twin turbochargers, with quiet operation. An array of advanced engine technologies including high-speed combustion and straight intake ports contribute to outstanding thermal efficiency, optimising both engine and fuel performance. The twin turbochargers provide high turbo boost even at low engine speeds, optimising torque while reducing fuel consumption.¹

LS 500h - 3.5-litre V6 engine (8GR-FXS)

The hybrid system's V6 engine integrates advanced technologies that include Dual VVT-i and D-4S fuel injection systems that generate a powerful driving experience. In testing, detailed analysis of 'everyday acceleration' from drivers inspired a whole new approach. Including fine-tuning drive-force control to improve response and power, adding torque even when the driver depresses the pedal under half way down. The end result is a smoother, quieter acceleration that can easily be enjoyed in regular daily drive conditions.

¹Results achieved for LS 500 and LS 500h in ADR81/02 combined drive cycle fuel consumption testing. Urban cycle results achieved 8.5L/100km (LS 500h) and 14.2L/100km (LS 500) and extra urban cycle achieved 6.3L/100km (LS 500h) and 7.6L/100km (LS 500). Results produced in laboratory test conditions, using sample vehicles without fitment of accessories/customisation, and do not reflect real world driving. Figures should only be used for comparative purposes. Overseas model shown. Australian specifications and features may differ. See your Lexus driver for details.

— PERFORMANCE

Multi Stage Hybrid System

The Multi Stage Hybrid System's 10-speed shift control optimises the hybrid system's characteristics to provide exceptional driving performance. The direct and continuous acceleration feel matches the increase in engine revolutions per minute (RPM), together with excellent shifting rhythm. This increases battery assist during acceleration at often-used speeds experienced in city driving and significantly enhances smooth start-up acceleration. At the same time, lower engine RPMs during start-up acceleration enhance quiet operation.

Engine sound

Active Noise Control (ANC) and Acceleration Sound Control (ASC) were fine-tuned to improve cabin quietness, and at the same time enliven driving enjoyment. ANC suppresses engine boom across a wide range of engine speeds, while ESE tunes the sound of engine acceleration and deceleration to provide a powerful and linear sporty engine note.

LEXUS — FEATURES

Meticulous attention was paid to further refining the flagship comfort, utility and safety of each element to make every drive in the LS time well spent. Fusing craftsmanship with advanced technologies to create a modern expression of luxury that imbues an enriching experience to be enjoyed with confidence and peace of mind.

— FEATURES

The character lines of the bold silhouette, seamlessly flow into the slim headlamp unit. Integrated into the lighting, are 3-eye Bi-Beam LED headlamps with an innovative BladeScan Adaptive High-beam System (AHS) along with hospitality illumination via Daytime Running Lights (DRL). The touchscreen displays provide intuitive control of the audio, navigation, climate control and other systems, to put personalisation of a comfortable environment at your fingertips.

Headlamps

A slim 3-projector lamp unit above and innovative BladeScan AHS headlamps below provide excellent nighttime visibility for reliable, stress-free driving. The BladeScan system helps to dramatically enhance visibility at night, with a broad natural illumination range in high beam, that supports early recognition of pedestrians and road signs. The L-shaped LED DRLs in the middle provide fade-in and fade-out 'Omotenashi' illumination after the doors are unlocked and locked.

Rear combination lamps

The distinctive L-shaped rear combination lamps blend harmonious form, heightened by the use of Piano Black trim, with advanced functionality. The sequential turn signal lamps illuminate in a sharp, well-defined flow that intuitively communicates the turning direction to following vehicles. Aero stabilising fins integrated into the design contribute to excellent handling stability. All lamps, including on the boot, use LEDs.

Door mirrors

The curvature of the mirror was optimised to enhance rear visibility in a compact size. Sculpting the inside of the mirror visor gives it a sharp shape, creating more space between the mirror and front pillar and enhancing aerodynamic performance while reducing wind noise.

— FEATURES

Hands-free power boot

Even if both hands are full, when carrying the Electronic Key you can open and close the boot automatically by moving your foot under the rear bumper.

Moonroof

An outer sliding mechanism slides the glass above the roof to create a spacious open feeling.

Boot space

The LS's boot area is created to be both smooth in appearance yet sensible and practical. With ample capacity for luggage and daily essentials.

— FEATURES

22-way power rear seats and power ottoman

Available on Sports Luxury models, motorised rear seats utilise a pneumatic system which inflates and deflates air bladders, allowing you to make the most precise of adjustments. The rear seat behind the front passenger's seat has a power ottoman that provides generous support to the lower legs so the occupant can relax in refined comfort. In addition, three position presets allow the occupant to choose their preferred posture. 'Business' is the normal position. 'Entertain' reclines the seatback to a relaxing angle and positions the front passenger's seat for optimal viewing of the rear seat display. 'Relax' moves the front passenger's seat to the forward-most position and deeply reclines the rear seatback to optimise the rear seat space.

Rear seat entertainment system

Available on Sports Luxury models, the rear seat entertainment system includes 11.6-inch displays that automatically adjust with the seat position to maintain an excellent angle for easy, ideal viewing. Also included is a Blu-ray player, SD card slot and an HDMI jack that enables the connection of a computer or other devices. Rear seat passengers can also enjoy videos, music and other media stored on mobile devices using Miracast.

FEATURES

Image is indicative only and not to scale.

12.3" Multimedia System Touch Display

The 12.3-inch Multimedia System supports intuitive control of navigation, audio and other systems via touchscreen technology, while maintaining a forward line of sight and comfortable driving posture. The system is Wireless Apple CarPlay^{®1} and Wireless Android Auto^{™1} compatible for easy interaction with supported Apps.

Heater and ventilation switches/console box

Switches for the seat heaters, heated steering wheel, seat ventilation and rear sunshade are integrated into the upper console, enabling easy operation while allowing the driver to maintain a forward line of sight and natural driving posture. Integrated AUTO indicators illuminate whenever AUTO functions are activated, for quick recognition of operational status. The convex shape of the heater switches enables easy, intuitive operation. The concave shape of the centre console box lets you store a smartphone inside without lifting the lid, enhancing convenience. The depth of the storage space was carefully designed for both smooth shift lever operation and easy access to the smartphone.

¹Requires compatible device, USB connection or Bluetooth[®] connection for vehicles fitted with wireless CarPlay[®] and wireless Android Auto[™] mobile data, network reception and GPS signal. Mobile usage at user's cost. Apps subject to change. For details see lexus.com.au/connectivity. Functionality varies depending on device. See apple.com/ios/carplay or android.com/auto for compatibility. CarPlay[®] is a trademark of Apple, Inc. registered in the U.S. and other countries. Android Auto[™] is a trademark of Google LLC. Bluetooth[®] is a registered trademark of Bluetooth SIG, Inc. Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— FEATURES

Rear multi-operation panel

Available on Sports Luxury models, the multi-operation panel display inset in the rear centre armrest puts intuitive control of the audio, air-conditioning, seat adjustments and relaxation functions, sunshades and lighting at rear passengers' fingertips. An intuitive graphic interface that groups frequently used functions enhances easy operation.

Mark Levinson®¹ QLI Reference Surround Sound System

Since 1972, Mark Levinson®¹ has been dedicated to uncompromising audio fidelity as the audio reference standard. The LS's 16-channel 3D surround sound system drives 23 speakers. The 7 Unity speakers, ceiling speakers and Quantum Logic Immersion (QLI) surround technology fill the cabin with uniform sound quality, enveloping the listener in unparalleled sound with the precise positioning of a live sound stage, achieving excellent separation and dynamic reproduction of sound sources.

¹Product and company names are trademarks of their respective owners.
Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— FEATURES

Cool box

Available on LS 500 Sports Luxury models, an air-chilled rear cooler above the central console box keeps items cool. Cool air vents allow the airflow to be switched on and off as needed.

Power sunshades (rear doors, rear quarter windows and rear window)¹

The rear window sunshade covers the entire window on both sides with no gaps. Operation of the rear quarter window sunshades is linked to rear door window sunshades providing comfort and privacy in the rear seats.

¹Rear Door and Rear Quarter Window Power Sunshades available on Sports Luxury models only. Rear Window Power Sunshades available on all models. Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— FEATURES

28-way power front seats

The power seats combine motors and a pneumatic system to allow fine-grained adjustment of the seat to support every part of the body. Optimising support for different physiques provides a feeling of unity with the car, with the shoulder, hip and cushion side support contributing to stable body positioning during braking and cornering. Frequently used functions such as slide and recline, together with headrest up and down, are controlled using switches located on the side of the seats. Adjustment of both seats can be fine-tuned using the Multimedia System display. The driver also has independent control of the front passenger seat to adjust the seat for the comfort of rear seat passengers.

Front refresh seats

Available on Sports Luxury models, air bladders integrated into the seatback and seat cushion are inflated to apply pressure from the occupant's back to the thighs, adding a sense of relaxation. Programs can be selected for the entire body as well as particular areas (Upper Body, Lower Body and Lumbar).

— FEATURES

Relaxation seats with warming function¹

Air bladders integrated into the seat cushion and seatback are inflated to apply pressure to the occupant's back and thighs. The system also utilises dedicated heaters to promote relaxation through repeated warming and cooling. A total of seven programs for both the entire body (Full Body Refresh, Full Body Stretch and Full Body Simple) and specific parts of the body (Upper Body, Lower Body, Shoulder and Lumbar) can be selected.

Lexus Climate Concierge

Available on Sports Luxury models, Lexus Climate Concierge coordinates 4-zone independent temperature control to automatically control, automatically controlling air conditioning and controls across seat heating, seat ventilation and steering wheel heating. The body surface temperature of occupants is detected by Infrared Rays (IR) matrix sensors to quickly provide the optimal level of comfort for all occupants. It also detects sunlight in the early morning and at sunset and controls the vehicle's climate control system to maintain comfort.

¹Outboard rear seats available on Sports Luxury models only.

Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— FEATURES

Easy access buckles (front seats)

Available on Sports Luxury models to make the front seatbelts easy to use, the seatbelt buckle lifts up when the door is opened and then moves back down once the seatbelt is fastened.

Electronically controlled air suspension (with access mode)

In addition to the vehicle height adjustment function which can be switched between Normal and High settings, access mode automatically raises the vehicle to make entry and exit easy.

— FEATURES

Power easy access system

The front seats feature auto slide-away and return functions, together with auto lift-up function (driver's seat only) and cushion side-away function. For easy access, auto lift-up raises the seat lifter when the driver gets out and then returns it to the original seat position when the driver gets in. Cushion side-away opens the outboard side cushion supports to reduce the pressure on the thighs while getting in and out.

LEXUS — F SPORT

Taking its sporting DNA from the LFA supercar, the F Sport brings exhilarating performance and a unique personality to Lexus. The F Sport builds on the spirit found in the LS as a car made for drivers and adds sporting ability. So that drivers can enjoy a unique sense of oneness with their car, responding immediately to every intention across a range of driving and on-road situations.

— F SPORT

F Sport Spindle Grille and Side Grilles (Mesh Type)

The exclusive spindle and side grilles inherit the F Sport vertical pattern in a meticulous design that combines small L-shaped pieces. The jet-black, chrome-plated accent on the side grilles wraps around to the side, accentuating the wide, low stance and aggressive presence. This is reinforced by the colour of the 20-inch wheels.

20" Alloy Wheels (Hollow Chamber) with Front 245/45RF20 + Rear

The F Sport uses different tyre sizes on the front and rear to provide exceptional handling stability and boost rear tyre grip. The design of the exclusive F Sport wheels inherit the DNA of the LC, evoking sports driving performance. They are finished in a black textured coating with a black centre ornament, complementing the jet-black accents in the lower body.

— F SPORT

F Sport Leather-accented Ultrasuede Sport Seats

Applying expertise gained in motorsports development, the seats incorporate protruding shoulder supports finished with Ultrasuede, a material with high friction resistance, to effectively hold the occupant. To enhance ride comfort, the front seats feature a deep-hung cover construction and a redesigned seat pad. The perforated section of the seats features the same L-shaped pattern as the spindle grille.

ADVANCED — TECHNOLOGY

For greater peace of mind the LS integrates advanced active and passive safety technologies. All that offer leading levels of driving assistance and margins of safe driving performance, providing the freedom to drive confidently, comfortably and safely.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM +

Pre-Collision System with Pedestrian Alert¹

If the system determines a collision with a pedestrian in front of the vehicle is possible, Pedestrian Alert is designed to help the driver intuitively recognise the hazard by displaying an animated warning indicating the direction in which the pedestrian is located in a large colour head-up display.

Pre-Collision System with Active Steering Assist¹

When the millimetre-wave-radar and stereo camera sensors detect a pedestrian or a continuous obstacle such as a guardrail in the vehicle's lane, a number of items activate. If it is determined that a collision is likely and cannot be avoided by braking control with pre-collision braking only, but could be avoided with steering control then that is activated. The Pre-Collision System is designed to augment the display warnings and braking control by activating Active Steering Assist to automatically control steering to help avoid a collision or mitigate the impact force.

Front Cross Traffic Alert (FCTA)¹

If the system detects a vehicle approaching from the front left or right when entering an intersection, it is designed to attract the driver's attention with an animated warning in the large colour head-up display showing the direction the vehicle is approaching from. If the driver continues to proceed despite the approaching vehicle, it will further prompt the driver with a buzzer and warnings on the display. This system also works in conjunction with the Panoramic View Monitor on the 12.3-inch Multimedia touch display.

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely. Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM + 

Lane Change Assist (LCA)¹

While driving on highways and automobile-only roads with Lane Tracing Assist (LTA) activated, LCA is designed to support operations to change lanes, including steering, acceleration and deceleration, and monitoring vehicles in the target lane. LCA uses driver activation of the turn signal lamp as the cue to engage lane change support. After the lane change is completed, the turn signal lamp automatically turns off.

Pre-Collision System¹

When the millimetre-wave-radar and monocular camera sensors detect a vehicle ahead, a pedestrian during the day or at night, or a cyclist during the day and determine that a collision is likely, the Pre-Collision System is designed to alert the driver and activates pre-collision brake assist when the driver depresses the brake pedal. If the driver cannot depress the brake pedal, it activates the pre-collision brake to help avoid a collision or mitigate the impact force.

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely. Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM +

All Speed Active Cruise Control¹

In addition to maintaining a constant speed, All Speed Active Cruise Control is designed to use the millimetre-wave-radar and monocular camera sensors to detect a vehicle driving ahead and maintain an appropriate distance between vehicles.

Lane Tracing Assist (LTA)¹

When Lane Tracing Assist is activated, it is designed to alert the driver of possible lane or road deviations and helps assist steering to avoid them. In addition, while driving on highways and motorways with Dynamic Radar Cruise Control (with full speed range) activated, it is designed to assist steering to help keep the vehicle in the lane.

Road Sign Assist (RSA) (Speed Signs Only)¹

To help support safe driving, RSA is designed to use the monocular camera sensor to detect speed limit signs and displays them on the multi-information display. In the event the driver exceeds the detected speed limit, RSA provides a visual notification.

Adaptive High-beam System (AHS)¹

In the BladeScan AHS, LED light is projected onto a plate rotating at high speed called a 'blade mirror,' with the reflected light passing rapidly through a lens to illuminate the forward direction. The LEDs switch on and off with optimal timing to enable fine control of light distribution, enhancing the range of illumination while blocking a small area in front of the car. This enables the BladeScan system to provide a broad field of high-beam illumination with natural light distribution to enhance the visibility of road shoulders and other more distant areas, supporting early driver recognition of pedestrians and road signs without dazzling the drivers of oncoming or preceding vehicles.

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely. Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM +

Blind Spot Monitor System¹

When the quasi-millimetre-wave radars in the rear bumper detect vehicles in adjacent lanes that aren't visible in the door mirrors, the system is designed to activate an LED warning indicator in the relevant door mirror the moment a vehicle enters this blind spot.

Parking Support Alert (PKSA)¹

PKSA detects stationary objects such as walls in the direction of travel, as well as vehicles and pedestrians approaching from behind while reversing, and is designed to alert the driver on the display and with a buzzer in the event that a collision is determined to be likely.

Image is indicative only and not to scale.

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely. Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM + 

Colour Head-up Display

The system helps the driver intuitively understand warnings and take action to avoid potential hazards with animations and information projected on the display. The screen is divided into different areas to effectively bring information to the driver's attention including cautions and warnings, driving support, road speed signs, vehicle speed, navigation and other information.

Panoramic View Monitor¹

Video that provides the driver with a bird's-eye view of the vehicle on the 12.3-inch Multimedia touch display in real time helps the driver to check conditions around the vehicle that are difficult to see. Side Clearance View: Assisting the driver to check safe clearance to the side of the vehicle. Cornering View: Helps the driver to check clearance when turning left or right on a narrow road. When the Side Clearance View is active, the Cornering View is automatically displayed in response to steering operation.

Automatic Rear Seat Reclining

When the rear seat is unoccupied, it automatically reclines in tandem with shift operation. If the headrest is raised, it also lowers to provide a wide field of view in the interior mirror.

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely.
Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM + 

Digital Rear-view Mirror¹

The Digital Rear-view Mirror can be switched from optical to Digital Rear-view Mirror mode at a touch of a switch in the bottom of the mirror. In Digital Rear-view Mirror mode, the mirror helps assist safe driving by showing high-resolution, real-time images from the backup camera integrated in the rear licence plate accent, to provide a wider field of view than optical mode, unobstructed by headrests, luggage or passengers' heads. It also helps enhance rearward visibility when the rear sunshades are in use to provide privacy for rear-seat passengers.

¹Driver assist feature. Only operates under certain conditions. Check your Owner's Manual for explanation of limitations. Please drive safely.
Overseas model shown. Australian specifications and features may differ. See your Lexus dealer for details.

— ADVANCED TECHNOLOGY

LEXUS SAFETY SYSTEM +

Supplemental Restraint System (SRS) Airbags

The LS features dual-stage SRS Airbags (Front seats), SRS knee airbags (Front seats), SRS side airbags (Front and outboard rear seats) and SRS curtain shield airbags (Front and rear seats). SRS seat cushion airbags (Outboard rear seats) are also available for the power rear seats in Sports Luxury models.

Lexus Connected Services¹

The Lexus LS includes 3 years of complimentary access to Lexus Connected Services, a feature offering an advanced suite of three smart technologies designed for simplicity, safety and convenience. Firstly, (SOS) Emergency Call² is designed to instantly connect the driver to a trained agent who can direct emergency service providers to the vehicle's location if required. Secondly, Automatic Collision Notification,⁴ where the vehicle's built-in sensors notify the Emergency Call Centre automatically in the event of the vehicle detecting a collision, even if the driver is unable to place the call themselves. And finally, Stolen Vehicle Tracking,³ a feature making it possible to potentially locate the vehicle if stolen, in coordination with the Emergency Call Centre and the police.

¹ Connected Services complimentary period ends 3 years from delivery date. Fees and charges may apply thereafter. Not available outside Australia or if services disabled or terminated. Dependent on 3G/4G enabled DCM, GPS signal strength, mobile network coverage and other factors outside Toyota's control which can limit ability or functionality of system. Check your Owner's Manual for explanation of limitations.

² Driver assist feature only. Not a substitute for safe driving practices. Not available outside Australia, if service disabled or terminated, or after 2033/Telstra 4G sunset (whichever comes first). Only operates if vehicle's SOS button is pressed and vehicle ignition is on. Dependent on 3G/4G enabled DCM, GPS signal strength, mobile network coverage, call centre capabilities and other factors outside Lexus's control which can limit ability or functionality of system. Check your Owner's Manual or lexus.com.au/connectivity for explanation of limitations. Please drive safely.

³ Not available outside Australia, if service disabled or terminated, or after 2033/Telstra 4G sunset (whichever comes first). Dependent on sufficient battery power, 3G/4G enabled DCM, GPS signal strength, mobile network coverage, operational related components and other factors outside Lexus' control which can limit the ability or functionality of system. Owner/driver required to obtain Police report. Vehicle location information, if available, only provided to Police. Vehicle recovery not guaranteed. For details, visit lexus.com.au/connectivity.

⁴ Driver assist feature only. Not a substitute for safe driving practices. Not available outside Australia, if service disabled or terminated, or after 2033/Telstra 4G sunset (whichever comes first). Only activates if vehicle's DCM detects airbag deployment or impact sensor notification. Dependent on 3G/4G enabled DCM, GPS signal strength, mobile network coverage, operational related components and other factors outside Lexus' control which can limit the ability or functionality of system. Check your Owner's Manual or lexus.com.au/connectivity for explanation of limitations. Please drive safely.

Overseas model shown. Australian specifications and features may differ or be available on certain grades only. See your Lexus dealer for details.

LEXUS — TAKUMI

— TAKUMI

Our Takumi craftspeople strive for perfection in every aspect of their work, actively seeking enhancements by applying constant care and dedication to their artistry. They blend their skills with the power of technology to better anticipate the future.

LEXUS — OWNERSHIP SOLUTIONS

Lexus Ownership Solutions allow you to determine your finance costs and know the Guaranteed Future Value (GFV)+ of your vehicle from the outset. Offering you choice, control and certainty. In short, everything you'd expect from Lexus.

The Guaranteed Future Value (GFV) is the minimum value of your new or approved demonstrator Lexus at the end of your finance contract, as determined by Lexus Financial Services (LFS). If you decide to return your car to Lexus at the end of your term, LFS will pay you the agreed GFV which will be put against your final payment, subject to fair wear and tear conditions and agreed kilometres being met. The information provided is general in nature. You should seek your own financial advice to determine whether Lexus Ownership Solutions is appropriate for your individual circumstances. Please speak with your Lexus Dealer for more information. Terms, conditions, fees and charges apply. Lexus Ownership Solutions GFV products are available to approved customers of Lexus Financial Services, a division of Toyota Finance Australia Limited ABN 48 002 435 181, AFSL and Australian Credit Licence 392536.

— LEXUS OWNERSHIP SOLUTIONS

How does Lexus Ownership Solutions work?

You choose the deposit that best fits your needs.

- You choose your term, ranging from 1 – 4 years.
- You decide on the estimated kilometres you think the vehicle will have travelled at the end of the term (the End Odometer). The End Odometer will also include any kilometres already on the vehicle.
- Lexus Financial Services (LFS) then determines the GFV+ of your vehicle and calculates your monthly repayments with a final payment equal to the GFV. The GFV is the minimum value of your Lexus at the end of your finance contract. So, if you choose to return your Lexus at the end of the term, LFS will pay you the GFV which will be put towards the remaining balance owing on your account (subject to fair wear and tear conditions and agreed kilometres being met).

The end of the term? Simply replace, retain or return.

At the end of your term you can choose to:

- Replace or sell your Lexus using the trade-in value or sale price to pay the remaining balance of your account.
- Retain your Lexus and simply pay the remaining balance of your account (including final payment).
- Alternatively, return your Lexus and, subject to fair wear and tear conditions and the agreed kilometres being met, we'll put the GFV towards the remaining balance on your account.

Choosing your deposit – what is best for you?

With the flexibility of Lexus Ownership Solutions, you can choose the deposit that best fits your current needs.

- If, for example, you have funds tied up in other investments, you can choose to finance your new Lexus with a zero deposit.^{††}
- Alternatively, by using a larger deposit, you can lower your monthly repayments.
- Or, compared to other finance options over a similar term with no GFV or equivalent balloon final payment, Lexus Ownership Solutions can provide lower monthly repayments.^{††}

Want more certainty?

With Lexus Ownership Solutions, you've got the reassurance that at the end of the term (subject to fair wear and tear and agreed kilometres being met), you will know your GFV⁺, the minimum value of your Lexus from the outset, as determined by LFS.

What happens in the case of the unexpected?

If your vehicle incurs damage and does not meet the Fair Wear and Tear guidelines, LFS will give you the opportunity to have your vehicle repaired. Otherwise, LFS can organise the repairs and deduct the cost from your GFV. This adjusted GFV will then be the price that LFS will offer you if you return the vehicle at the end of your term. Of course, if you retain the vehicle, the condition doesn't matter, however, if you replace it or sell it privately, the condition will obviously impact your sale price.

So what does your accountant think?

Naturally, we think Lexus Ownership Solutions is an excellent, innovative way to put you in control of buying a new Lexus. That said, we suggest you seek independent advice to ensure Lexus Ownership Solutions is right for you.

Wouldn't it be great if Lexus Ownership Solutions was just the beginning?

Lexus' innovations and commitment to customer service extend well beyond Lexus Ownership Solutions. Once you purchase a new Lexus, you'll become a member of the Lexus Encore Owner Benefits Program and enjoy a host of exclusive benefits.[†] For further details, simply visit your nearest Lexus dealer or see lexus.com.au/owners/benefits

⁺The Guaranteed Future Value (GFV) is the minimum value of your new or approved demonstrator Lexus at the end of your finance contract, as determined by Lexus Financial Services (LFS). If you decide to return your car to Lexus at the end of your term, LFS will pay you the agreed GFV which will be put against your final payment, subject to fair wear and tear conditions and agreed kilometres being met.
